## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Gauthier et al (4,976,683). Gauthier discloses a peritoneal dialyzer comprising a catheter capable of injecting and discharging peritoneal dialysate in an abdominal cavity of a patient, a peritoneal dialysate circuit connected to the catheter, and a dialyzer comprising a hemodialysate circuit connected, means capable of measuring an osmotic agent concentration, and a mechanism for dehydrating the peritoneal dialysate; a pump, and the agent being one of albumin, glucose polymer, and dextran [see column 2 detailed description.]

3. Gauthier also discloses the method of peritoneal dialysis substantially as claimed. He discloses discharging the dialysate, measuring the osmotic concentration, calculating the amount of dehydration required, removing water, and injecting the dialysate into the patient [column 8 and claims 1-24].

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
